

Applications:

- Forestry
- Plantations
- Tree nurseries

Functions:

- Harvesting and thinning young trees
- Removing coppice regrowth

Technical Description:

Ideal for harvesting and thinning young trees, the FBS Series bunching shear attachments from AHWI are built tough with AR400 through-hardened blades. The FBS1400 single arm unit can handle diameters up to 355 mm, while the dual action FBS1500 is able to cut trees to 380 mm.

Heavy duty cylinders with large diameter cylinder rods ensure strength and fast cycle times.

Both units are designed for strength and low weight, to reduce ground pressure.

Technical Data:

Model	FBS1400	FBS1500
Weight	816 kg	861 kg
Dimensions (L x W x D)	1625 x 1220 x 1070 mm	1780 x 1630 x 1155 mm
Cutting capacity	356 mm	381 mm
Accumulating capacity	0.23 sq.m	0.23 sq.m
Total cycle time	8 seconds
