

Applications:

- Landscaping
- Plantations
- Tree nurseries

Functions:

- Lifting logs and rocks
- Feeding material into chippers
- Shifting waste material on construction sites

Technical Description:

The AHWI front mounted grapple for skid steers is perfect for brush and tree removal, transporting, loading and placing logs and rocks.

An excellent attachment for tree care and landscaping applications, it offers a 360 degree rotation. Maximum opening for the heavy duty serrated jaws is 1220 mm for the FG48 model and 1525 mm for the FG60.

Designed to fit your skid steer's universal mount with a minimum of fuss, the FG Series grapples are ideal for lifting logs for feeding into a chipper, shifting waste timber on construction sites, and moving logs and rocks for landscaping.
